NEW YORK, April 28.—If the President's message struck terror to the hearts of Wall Street traders, there wasn't the slightest indication thereof in the opening of the stock market either in the opening or in later trading. The financial interests have come to the conclusion that Congress is "not in its ways," and will do nothing, no matter how often the President reiterates his views and policies. Therefore the market is not the least negative effect other than to keep the industrial list from moving along in the sky-rocketing that followed the opening. Unquestionably the market is going up a pace, and there is a reaction on deck—past, which is very likely to develop before the top of the bull this afternoon.

Money and push. These are the influences that override the bad railroad earnings, that detract attention from the industrial depression, and that are now causing the public to look with envy on the advancing market, which will be, indeed, has already been followed by a large number of public orders on the market today.

And the big speculators and investors, the railroad magnates, and the financial interests that have been carrying the bag since last October, are now averse to peddling out many thousands of shares, which they will buy back at much lower figures.

Easy money is responsible for the retirement of the maximum limit of circulation, as banks cannot find use for their surplus funds, owing to dullness in general business. In order to retain this circulation the Secretary of the Treasury made a call for \$5,000,000 of Government deposits, but this had no effect on the situation.

It was a case of St. Paul, Reading, and Northern Pacific blaring the trail higher and higher, and dragging other roads after them. It was a case of those who had sold yesterday in anticipation of a reaction, making an unseemly scramble to get into the bandwagon, covering their shorts by buying the other way, in a quick right-about.

Professionalism, the plunger, and the holders of securities were all working for higher prices, and simply by unbridled enthusiasm, carrying out their will.

One of the jokes on the Street is the fact that a number of brokerage houses which sold out customers' stocks on the knowledge of conditions and hope of a reaction when they would be able to cover, have received orders to sell and have been forced to cover on the advancing market.

Louisville and Nashville surprised the Street by gaining 2 1/2 points. Manhattan turned 3 1/2 net gain easily. Missouri Pacific 1 point. New York Central, 3/4. Northern Pacific, 2 1/2. Northwestern, 1 1/2. Reading at 10 1/2 was a point up. Illinois Central, 1 1/2 higher; Southern Pacific, 1 1/2. St. Paul, 2 1/2, reacted 1/2. Union Pacific, 1 1/2. Atlantic Coast Line, 3/4. Delaware and Hudson, 3/4, and many stocks 1/2 to 3/4 of a point. Industrials were steady.

Entering the afternoon, even into the second hour, the market slackened not its speed. Here and there another stock jumped into prominence. Consolidated Gas and Chicago Gas taking the leadership in the industrials, while in the second hour Steel preferred joined the upturn and advanced 1/2 point.

Business was lively. If there is not a rush of profit taking in the final hour it will be a case of surprise to close observers.

In the last fifteen minutes of the session the market became decidedly soft, the natural and expected result of today's inflation added on the boom prices of the last two or three days. The reaction extended to 1 1/2 to 1 3/4 on all the leaders in the rails, but the Steel shares were strong to the close and higher.

NEW YORK COTTON IN A SEVERE BREAK

NEW YORK, April 28.—There was an excited opening in the cotton market this morning, with the undertone weak, prices showing considerably more loss than had been expected on the cables. The break was due to favorable news from the South regarding the weather. Interests and notching on 35,000 to 40,000 bales.

Trade was active.
